

DC Inverter Swimming Pool Heat Pump (Carel Technology)

- Italy Advanced DC Inverter Technology Supply Smoothness Control
- Japanese Tech DC Inverter Compressor And Titanium Heat Exchanger
- Ice Defrosting, System Pressure, Water Flow Switch Protection Functions Make Product Safety
- The Intelligent EEV Control, Supply Accurate Control and High COP
- Combined with Pressure Sensor Supply Much Accurate Control

NEW

Product Features

25% gas quota of R410a

Quiet as a fridge

Average COP 10.7
93% free energy

HIGH COP TO SAVE ENERGY COST

Industry leading efficient stepless DC inverter control system. With smart conversion of compressor, fan motor and pressure system, it provides amazing energy saving performance with max COP of 16.1.

INVERPAD TECHNOLOGY

More than 93% free energy

Thanks to the InverPad technology, the inverter provides an average of 93% free energy from ambient air.

Mitsubishi Twin-Rotary Inverter Compressor

Stepless Comfort Speed Conversion

DC Brushless Fan Motor

Product Features

SWIMMING POOL HEATING

Advanced Heat Pump Technology

Not only is the unit designed with superior appearance, but also powerful performance. With mature inverter technology combined with the adoption of Mitsubishi compressor, the unit can maintain high COP at 16 while running silently, which create wonderful swimming atmosphere for you!

SILENCE TO RELAX YOUR MIND

Low Noise Running

A fully enclosed cabinet is specially designed for the compressor so that the running noise can be kept inside and the noise of the whole unit can maintain very low.

Double-side Airflow Outlet

The unit uses double-side airflow cabinet which through years of application in the market is proven to be highly efficient in heat exchange and outstandingly silent during operation.

Optional Noise Absorbing Cover

On the cabinet, the lively interplay of sheet metal surfaces combined with irregular shaped pattern is reminiscent of a high-performance swimming pool heat pump products. More importantly, noise absorption cover effectively reduces 8dB(A).

UNIQUE PAD DESIGN INVERTER

Original Italian Carel Controller

Optional Noise Absorbing Cover

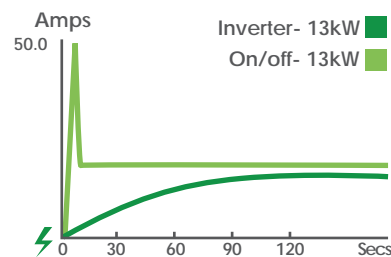

Garden Friendly Flat Surface Design

PROVIDES YOU A SIMPLE SAVING AND SILENT WARM POOL

Eco-friendly R32

32% GWP, 25% CO2 carbon consumption & 25% quota cost comparing to R410A.

Full Protection on Electrical system

With a DC inverter compressor, inverter will start from 0 amps and increase steadily. There is no rush to the house electricity system.

Wide Voltage Application

Self-adjustment to fit in unstable power supply, therefore voltage range can be 180V ~260V.

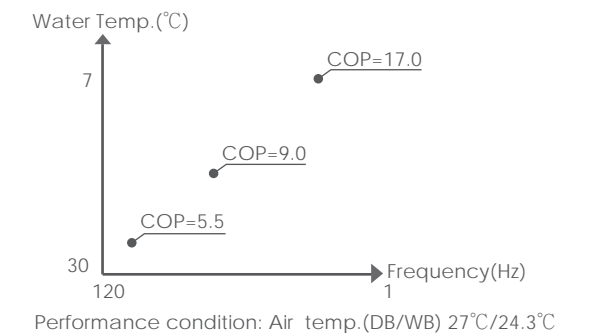

Extend your pool season!

Designed for down to Air -15°C Operation

Inverter Pool Heat Pump

Inverter technology makes swimming pool heat pump achieve an extremely high COP, comparing with normal heat pump in the market. Besides, the heating time is much shorter. It greatly enables you to enjoy swimming without a long waiting time.

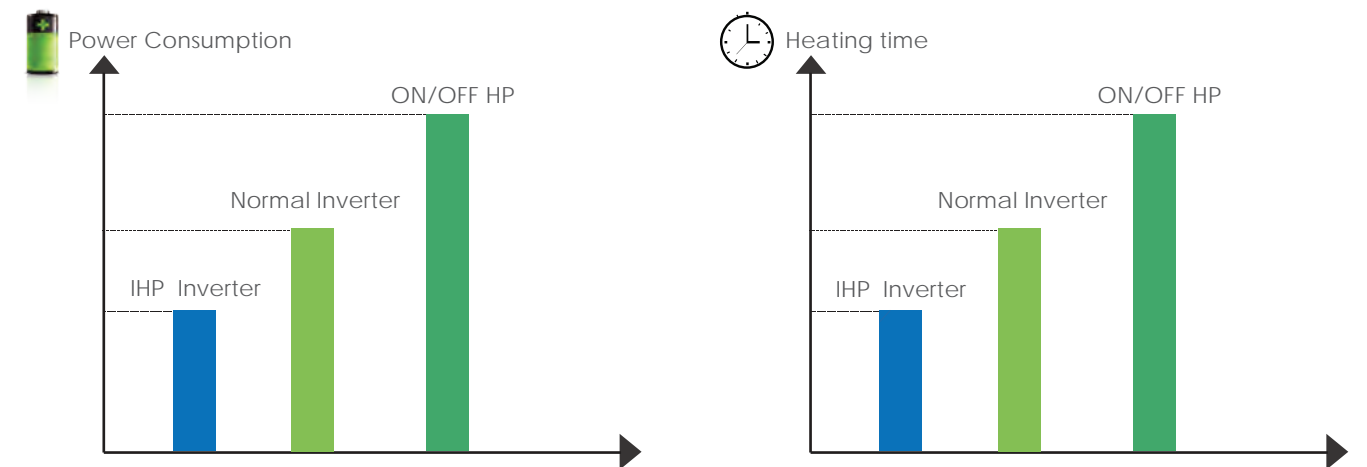

Maintain High COP in Different Ambient Conditions

Performance condition: Air 27°C/Water 26°C/Humidity 80%
 Performance condition: Air 15°C/Water 26°C/Humidity 70%
 Performance condition: Air 2°C/Water 26°C/Humidity 80%

Save Energy and Speed up Heating Time

With short heating time, users don't need to wait for a long time before enjoying swimming. In the mean while, it saves more energy than ON/OFF heat pump and normal inverter heat pump.
