Maintenance of the Lights

- Do not leave the lights "on" above water for longer than 1 minute.
- Before switching on the lights, check whether the lights are fully submerged underwater and the circuit boxes are running properly.
- This unit does not need any kind of maintenance. If it is not working properly, please contact EMAUX authorized dealer where you purchase the unit from.
- Warranty will be voided if the Emaux Underwater Light was dismantled by unauthorized personnel.

EL-S300

UNDERWATER LIGHT OPERATING MANUAL

Model: EL-S300-252, EL-S300-441, EL-S300-531

Keep this manual for future reference

▲ SAFETY WARNINGS

- Only suitably qualified installers is allowed to carry out the installation of this product.
- Avoid direct contact with electrical power.
- Respect all regulations in effect for preventing accidents.
- All units are required to be disconnected from the main electricity before any operation of maintenance.
- Never handle with wet hands and feet.
- This unit is design for use only when fully submerged in water, connecting with a safety transformer.
- Never operate this Underwater Light for more than 1 minute unless it is totally submerged in water.
- Be sure power is off before installing or removing LED plate. Allow LED plate to cool before replacing.
- This product should be installed according to your local electrical installation ordinances and regulations.
- Maximum Depth for Light installation at 1 meter.
- Maximum Water Temperature Range for light operation 0 30°C
- for type Z attachments
- The external flexible cable or cord of this luminaire cannot be replaced; if the cord is damaged, the luminaire shall be destroyed.

SPECIFICATION

A. Electrical Specification: 1) Voltage: AC12V 2) Frequency: 50/60Hz 3) Power: 20W/35W/50W B. Colour change options(For RGB version only)

1	White	2	Green
3	Blue	4	Green+Blue
5	Red+Green	6	Red+Blue
7	Mode A: Blue+ Gradual Red	8	Mode B: Green+Gradual Red
9	Mode C: Blue+Gradual Green	10	Mode D: Blue+Gradual Red
11	Mode E: RGB Colour Sequence: Red>Green>Blue		Auto Colour Change
13	Mode F: Four Colour Sequence: Red>Green>Blue >Purple	14	Rapid Auto Colour Change

Emaux water technology

C. Control

- 1) When the light is connected to the transformer directly, the on/off switch controls the colour changes (Associating a light with a transformer and an on/off switch is recommended: If you want all the lights to change colour at the same time, install a master switch, Figure 1).
- 2) If applicable, when the light is connected to the transformer and the transformer to the optional control box, the control panel on the control box and its remote control controls the colour changes (See the Control Box Manual for details)

INSTALLATION NOTES

- 1) You should follow the procedures closely when installing the light.
- 2) It is recommended to install a light every 20m², the approximate exposure area of each unit.
- 3) The lights should be installed in the direction that they will not shine directly into the house.
- 4) For training or competition pools, the lights must be installed on the sides in order to prevent swimmers from seeing any glare.
- 5) Nothing should be placed on the poolside directly above the lights for ease of future maintenance.
- 6) If the wires are connected inside the lights, you must seal the connections with leak-proof tapes or products with the same function.
- 7) The cables connecting the lights and the transformers must be at least 6mm² and the distance between them must not exceed 30m (Figure 2); otherwise the lights will not function properly.
- 8) Terminal blocks must meet the IEC60988-2-1 standard having the rated connecting capacity of 4,0mm2 use of screw-type terminal at least 25A rated current, mounted on junction boxes inside. See Figure2-1

Emaux

INSATALLATION OF THE UNDERWATER LIGHT

- A. Preparing to Install
- 1) Before installation, a circuit system diagram must be designed by a certified engineer.
- 2) The circuit system must comply with local laws and regulations and must be carried out by qualified electricians.
- 3) Make sure the voltage is 12V and the terminal box is at least 120cm from the poolside (Figure 3).
- 4) Upon installation, top of the light must be at least 45cm from water surface (Figure 3).

- B. Pool Installation
- 1) Embedded the lamp shell body into the cement wall and the edge of the lamp shell should be face flat by the swimming pool(Figure 4).
- 2) Screws on the lamp and face upward, the surface of the cover should be hooks on to the surface of the cover(Figure 5).
- 3) Attached the cover to the lamp housing and tighten up the above screws(Figure 6 & 7).
- 4) Lights should be installed on smooth or within the curved surface. Irregular or uneven wall surface can not be installed
- 5) All the cables should be wrapped behind the light and ensure all the cables are long enough for maintenance when it is out of the water.
- 6) The pool junction box wiring must be sealed with waterproof tape and to prevent water extension internal infiltration of water.

- C. Replace the lamp panel
- 1) Before maintaing underwater lights, connected to the anti underwater lights and circuit breaker between the power is cut off, as above-mentioned instructions did not comply it may result in serious injury and even death.
- 2) Unscrew the top bit, removed underwater lights from the wall, cautiously put water light on the platform.
- 3) Figure 8, first loosen the four screws and then remove the clamping block, Remove and replace the lamp.
