Salt Chlorinator

INTELLIGENT WATER DISINFECTION SYSTEM

The CyberSync Salt Chlorinator marks a major upgrade. Its low-salt operation (1000 ppm) leverages advanced electrolyzer technology to deliver extremely soft water. Salt levels are so low they're almost imperceptible, significantly reducing skin, eye (especially for sensitive individuals), and hair irritation. Skin won't feel tight or sticky after swimming. It integrates seamlessly with the Smart Life app for real-time monitoring to ensure optimal water quality. This advanced IoT pool system improves maintenance efficiency with its modern, user-friendly interface and powerful protection programs designed for various operating environments.
