PURE SCIENCE PURE WATER

For water features, pools & spas

SpinX

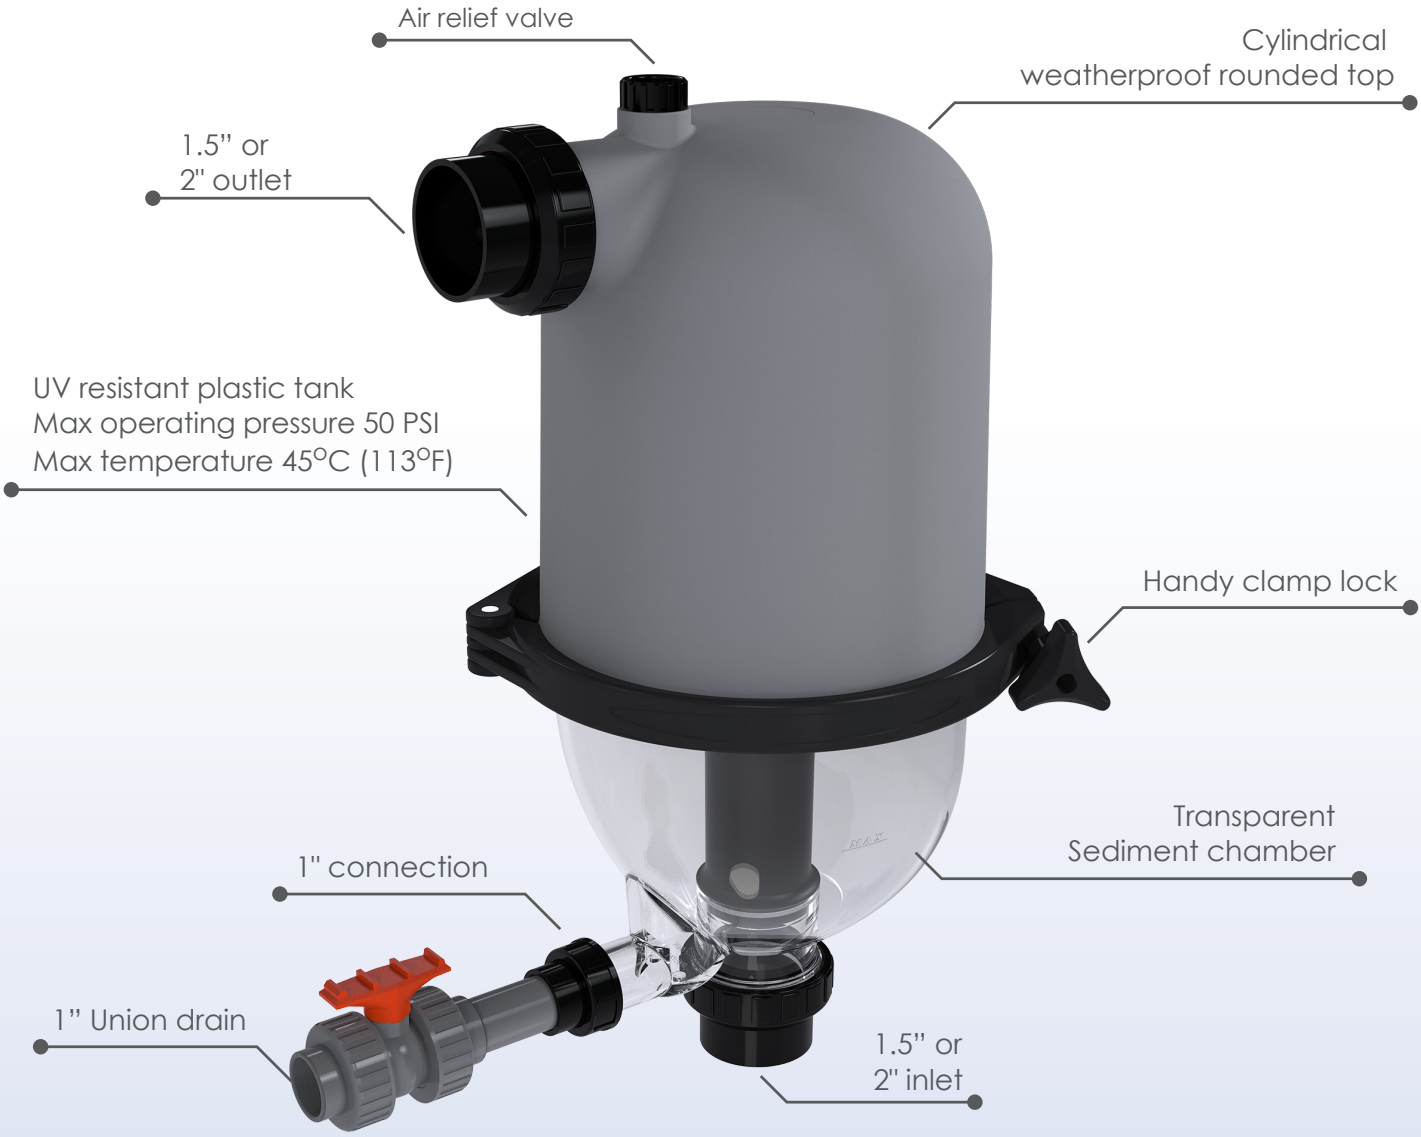

CYCLONE FILTER

Compact Footprint, Maximum Impact

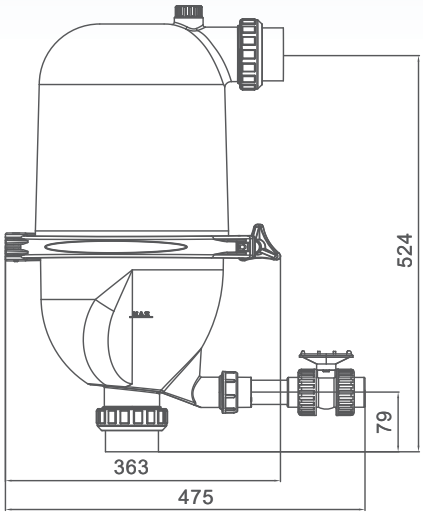

The Emaux SpinX Cyclone Filter is an advanced pre-filtration device operating on the principle of centrifugal separation, engineered with no moving parts and requiring no filter media to clean or replace. It pre-filters up to 80% of the incoming debris load, significantly reducing the workload of the primary swimming pool filter and lowering backwash frequency. This results in water savings of up to 7,000 liters per year for an average residential swimming pool. Designed for vertical installation, the compact unit requires minimal piping, resulting in reduced hydraulic head loss.

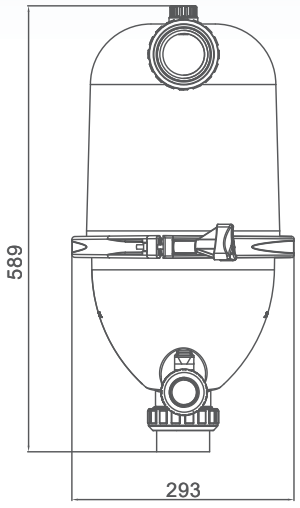

SpinX
CYCLONE FILTER

Note: Centrifugal filtration is exclusively designed to separate sediments and particulates with a specific gravity greater than water. Floating debris and light-weight contaminants cannot be removed via hydrocyclone separation.

Dimensions

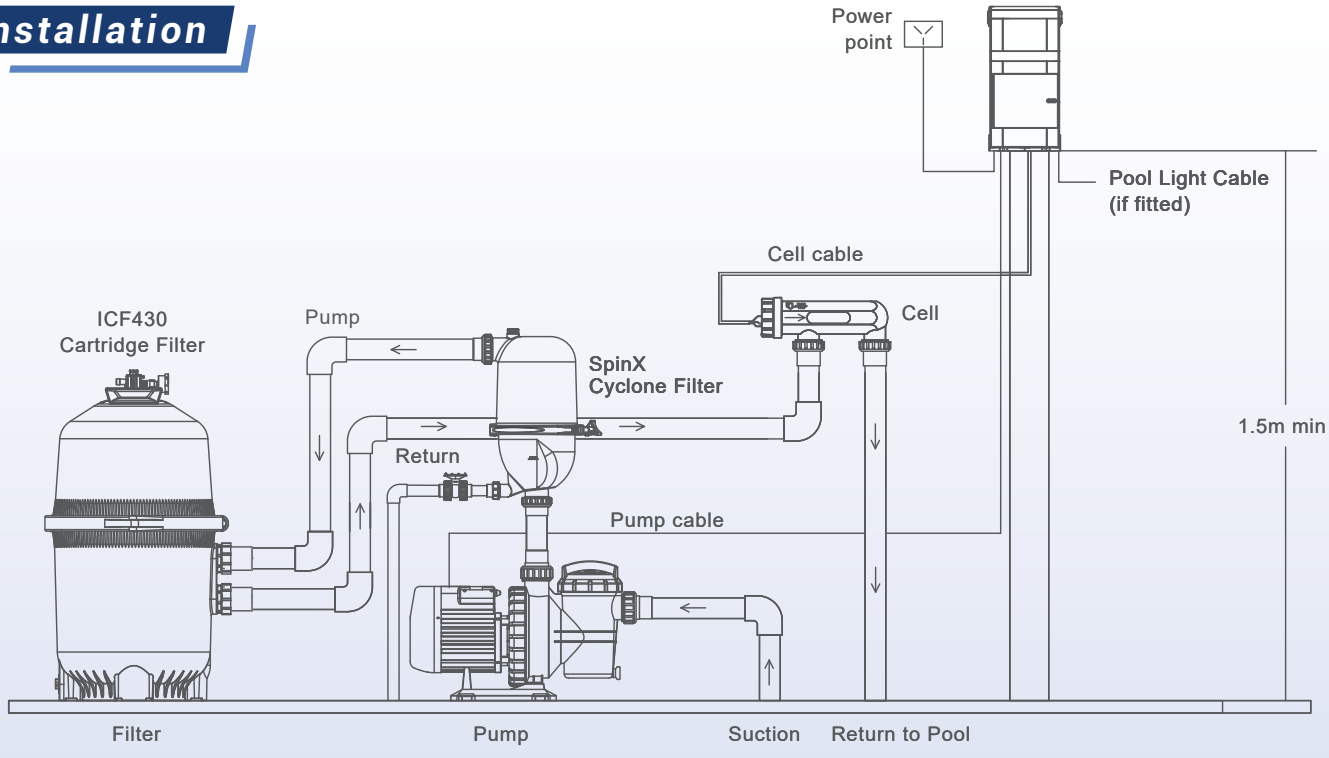

Product feature:

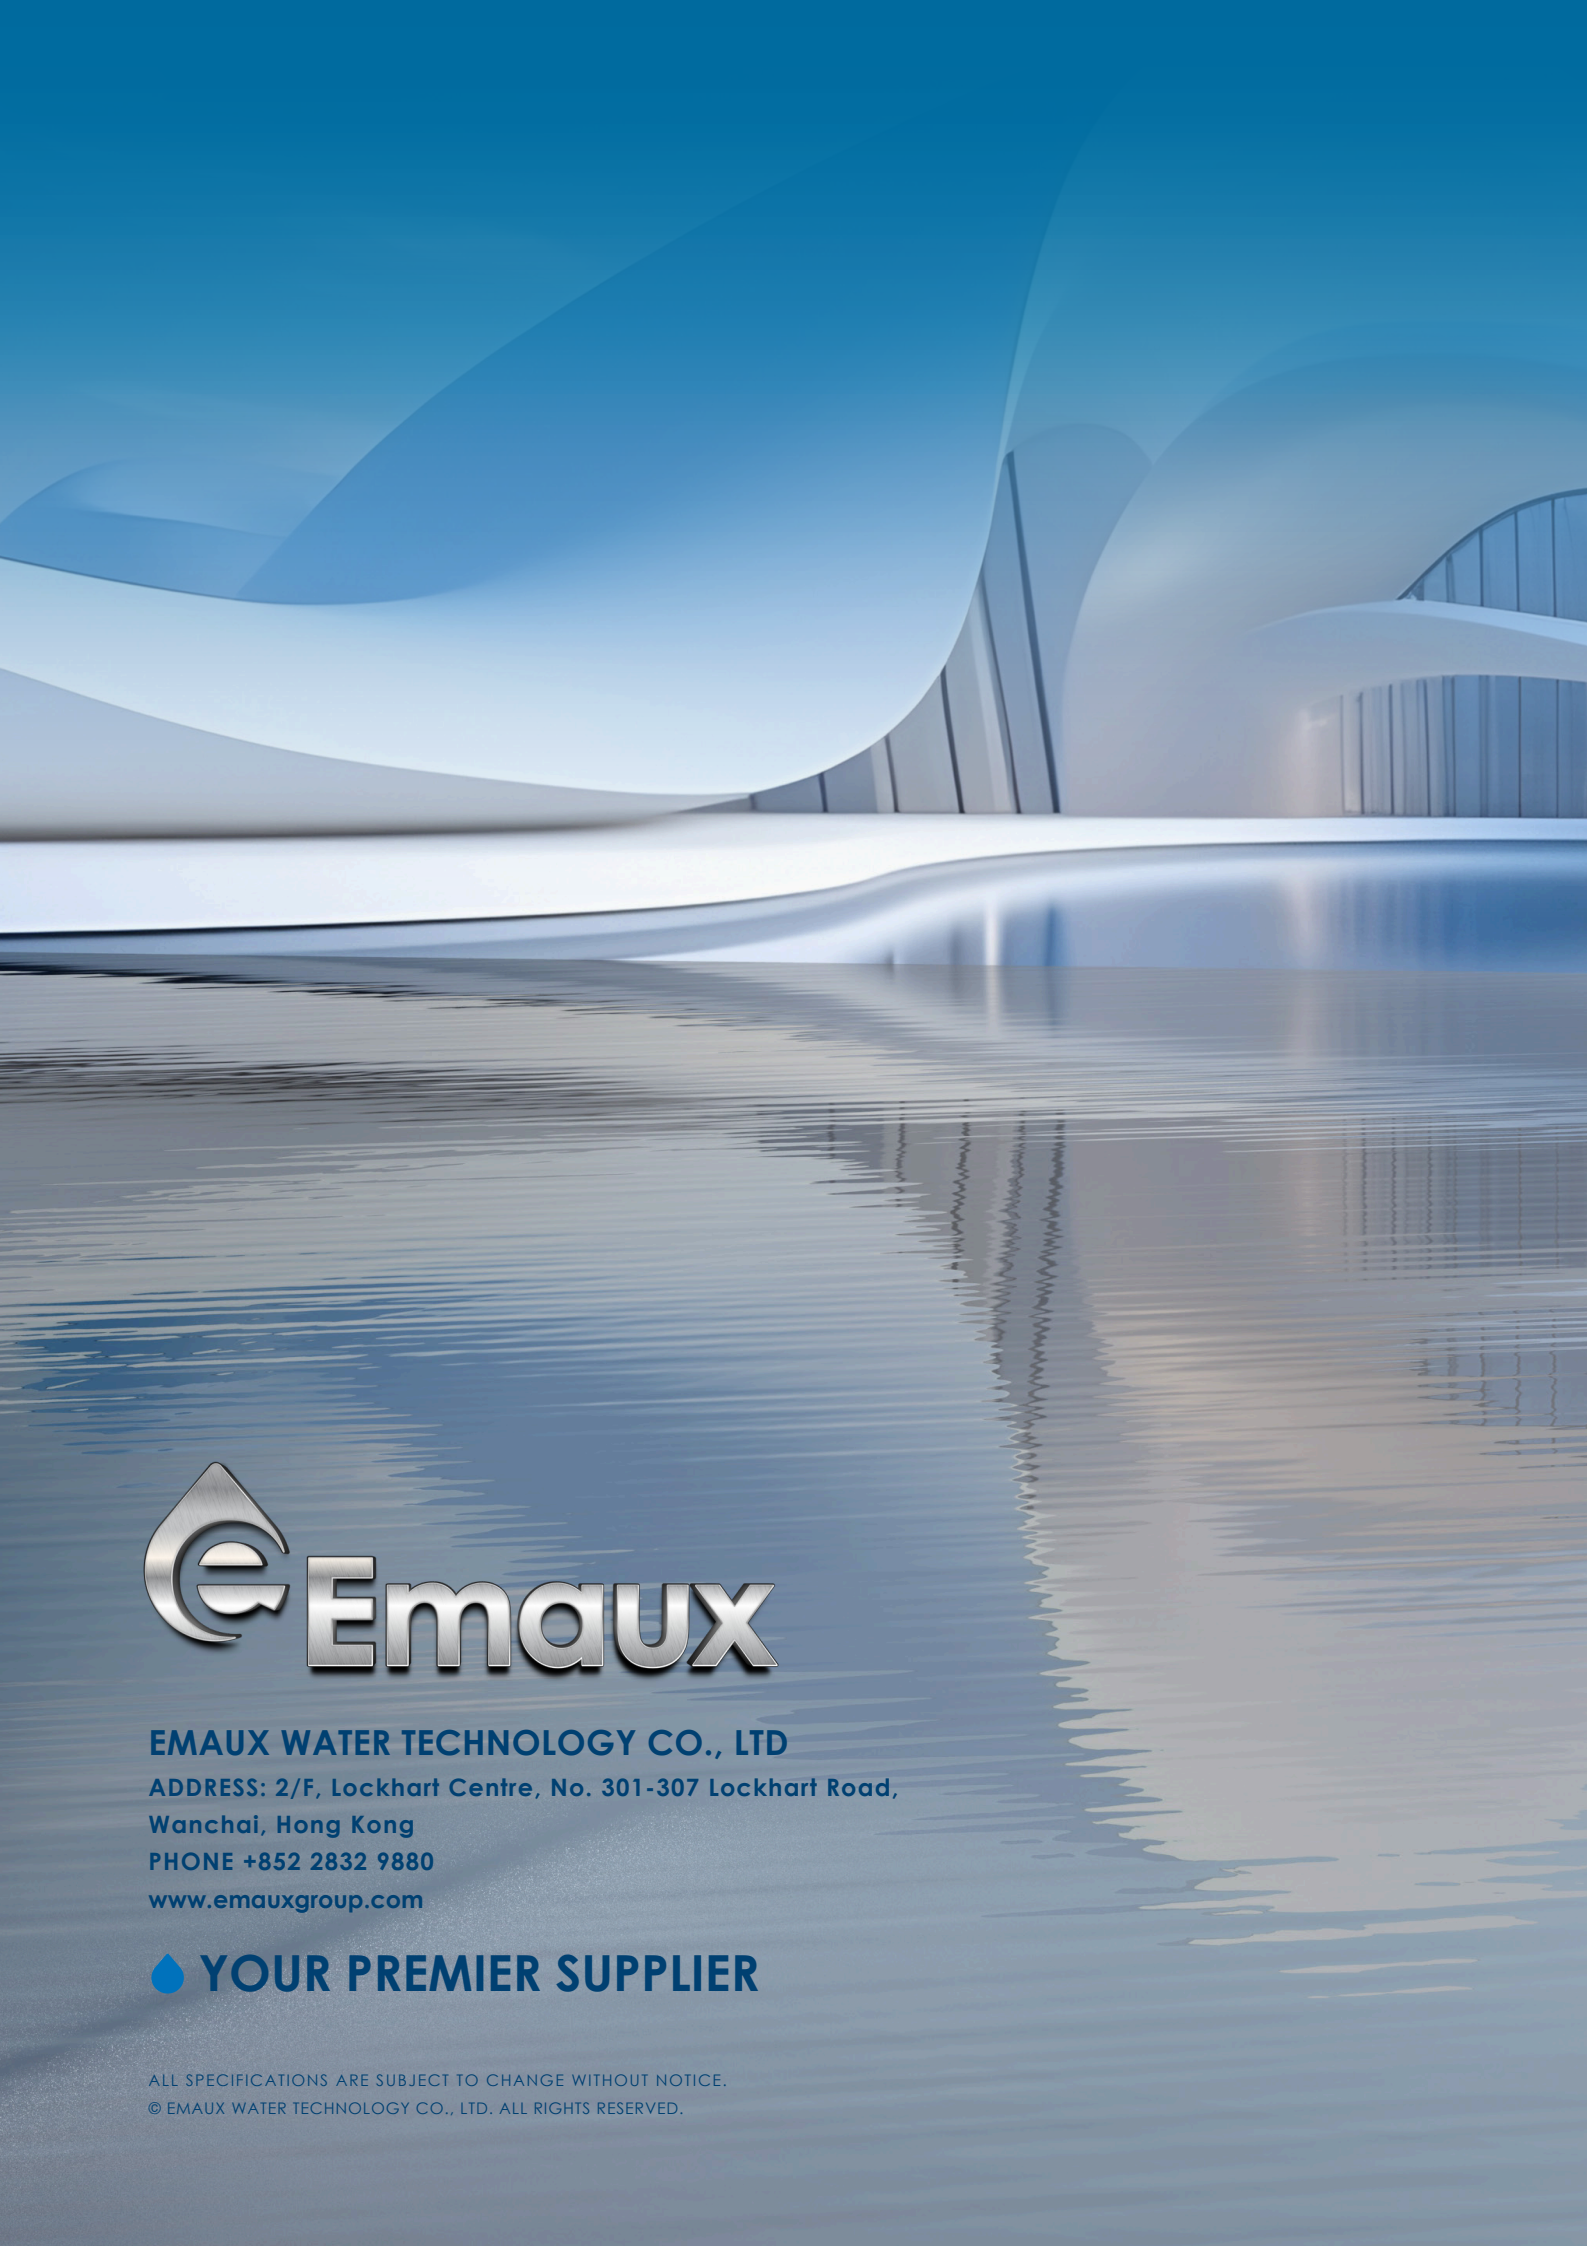

- *Enhanced Filtration System*
- *Minimising filter maintenance and saving water*
- *Minimise backwash frequency*
- *Suitable for new and existing installations*

Technical Information

Code	Model	Minimum Flow rate	Maximum Flow rate	Filter area	Connection size	Operating temperature	Maximum pressure
9230101	SpinX 300	3m³/h / 50LPM	17.1m³/h /285LPM	3.7m² / 40ft²	1.5" or GB50 2" or GB63	5 - 35°C	350kPa / 50psi
